## **HYPERFLOW AIRKNIVES AND NOZZLES**

***LAMINAIR Systems* HyperFlow Airknives and Nozzles have been designed as low cost high efficiency replacement for compressed air blow-off systems. Can be used as a direct replacement to a compressed air system with improved performance and a typical 6 month ROI from energy savings alone.**

### **Features:**

- **Laminair air flow design.**
- **High velocity output for water blow-off.**
- **High performance coatings to reduce drag, and improve velocity and flow rate.**
- **Air hose connection to improved hose retention.**
- **Fan generated supply system. Typically 10% the cost of compressed air.**
- **Ionizer option for static control.**
- **Reduced noise levels.**
- **Easy mounting**
- **Many sizes to fit your application**
- **Custom system design**

### **Specifications:**

Standard sizes:

#### **Nozzles**

4 x 2  
4 x 1 ½  
2 x 1  
6 x 3

#### **Airknives**

6" dia x 12"    6" dia x 24"  
6" dia x 30"    6" dia x 36"  
6" dia x 42"    6" dia x 48"  
6" dia x 60"    6" dia x 72"

Custom lengths available from 12" to 120"

#### **Air Supply:**

**Fans sized to the application**

12" to 50" Wg  
250-6000 CFM
